DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3, and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gibbons in view of Speier.

Gibbons discloses an apparatus comprising:

a first rigid steel bar 20 having a first end, a second end, and an outside diameter;

a rigid metal hooking rod 30 made of solid steel having a first end and a second end, the first end being pivotally attached to the first rigid metal bar, the hooking rod having a bent hook 36 at a second end away from the first end.

Gibbons fails to disclose a metal ring welded to the rigid metal bar.

It is known in the lever art, for example as shown by Speier, to provide an attachment structure comprising a metal ring 32 welded to a rigid metal bar and having an inner diameter which is larger than the outer diameter of the rigid metal bar.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Gibbons by using the attachment structure disclosed by Speier to attach the rigid metal hooking rod to the first rigid metal bar, as the two are art recognized equivalents.

Art Unit: 3611

3. Claims 4-5 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gibbons in view of Speier.

Gibbons, as modified above, discloses the claimed invention except for the disclosure of zinc plating or painting.

The examiner takes official notice that it is well known to zinc plate or paint steel objects in order to prevent rust and corrosion.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose single throw levers with intermediate pivotally attached hooks.
